

METALBEST® & SELKIRK ALL-FUEL CHIMNEY SYSTEMS

METALBEST® CHIMNEY SYSTEM (MCS)

Design Engineered for safety, Platinum Series™ chimneys are packed with one inch of premium fiber insulation, ensuring a 100% fill. This insulation maintains higher internal flue temperatures, enhancing draft and efficiency. Low temperatures are maintained on the outer casing, allowing installation as close as 2" from combustible materials. Assembled with the Positive Joint Coupler, the safest and most secure locking system in the industry, Ultra-Temp™ and Galva-Temp™ chimney sections twist together with a 1/8 turn. A locking band ensures system integrity and strength for the life of the chimney.
